Target version:				
Version:	0.13.1		**OS:**	Any

Description

All the minimize to tray functions (on close, on minimize etc.) should be disabled on Mac OS X.
1.) it doesn't bring the benefits it has on windows as the App still remains in the Dock.
2.) similar effect has the default Mac OS X short cut Cmd-h
3.) once the app has been minimized to the tray there is *NO* way to restore it.

Therefore:
disable or better hide the settings for this feature and deaktivate it's functionality on Mac OS X.
