

Quassel IRC - Bug #994

Add handlers for channel forwarding;

06/16/2010 12:54 AM - JabLuszko

<b>Status:</b>	New	<b>Start date:</b>	06/16/2010
<b>Priority:</b>	Low	<b>Due date:</b>

<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.6-pre		
<b>Description</b> If you join channel (let's say #ubuntu-release-party) which was later closed and forwarded to #ubuntu, the core will still try connecting to #ubuntu-release-party; (which looks like a good behaviour) but... It will even happend to it, if you leave #ubuntu (not #ubuntu-release-party which can't be joined) before restarting the core. Looks like if the channel is forwarded and we leave from the 'forwarded channe' the core should also mark the 'first channel, which forwarded us' like a 'not connect at start';  Currently you can change the behaviour from the sqlite3; sqlite3 ~/.config/quassel-irc.org/quassel-storage.sqlite update buffer set joined=0 where buffername="#ubuntu-release-party";
